Maternal Health Risk Analysis Report

01

Dataset Overview

The maternal health dataset comprises 1,014 patient records with six clinical features: Age, Systolic Blood Pressure (BP), Diastolic BP, Blood Sugar (BS), Body Temperature, and Heart Rate. Each record is classified into one of three risk categories: low risk (40.0%, n=406), mid risk (33.1%, n=336), or high risk (26.8%, n=272).

The dataset is complete with no missing values. Descriptive statistics show diverse patient demographics (age range 10–70 years, mean 29.9) and vital sign measurements spanning clinically relevant ranges. Key statistics:

Metric	Mean	Std Dev	Min	Max
Age (years)	29.9	13.5	10	70
Systolic BP (mmHg)	113.2	18.4	70	160
Diastolic BP (mmHg)	75.2	13.2	40	114
